

Bushfire Community Recovery Grants Program

To support communities with the recovery efforts from the 2019/2020 Black Summer Bushfires, we seek applications from eligible charitable organisations for funding of programs from bushfire affected communities across Victoria, South Australia, New South Wales, Queensland and Western Australia.

Grant applications need to focus on the short-term recovery of communities that were impacted by the Black Summer Bushfires in 2019/2020 and will need to be one off, community led projects delivered by organisations within the next 6-12 months.

Funding will support the resilience, rebuilding and strengthening of the social fabric within communities, with priority given to community-led activities that promote one or all of the following:

People: Supporting individual recovery and resilience building

Social: Supporting community connectedness and recovery of organisations

Economic: Supporting community initiatives that assist the economic restoration of communities

Environmental: Supporting the conservation and re-establishment of the natural environment

Grant program

Open - 16 November 2020

Close - 11 December 2020
